Dezign Works now supports Pro Engineer Wildfire 3 and 4!

Mooresville, NC August, 2008 - *Creative Dezign Concepts Inc* announced that *DezignWorks*, a feature based *reverse engineering software product*, now supports Pro Engineer Wildfire 3 and 4. *DezignWorks* a PTC Silver Partner enables Pro E users to perform reverse engineering functions directly inside the Pro Engineer environment, maintaining full associability to their existing model. This will allow better designed products faster and more efficiently, decreasing valuable time.

DezignWorks is known as the industries standard solution for feature based reverse engineering. *SolidWorks* and *Autodesk Inventor* will now bring their patent pending technology to Pro E Wildfire. *DezignWorks* has the ability to capture data directly from a digitizer device within the native Pro E interface, creating features and allowing interactive editing. With *DezignWorks*, complex real world shapes can be quickly and easily captured. The movement of the digitizer is stored in the device manager so data can be reused persistently without the need to re-analyze the model. For a complete review take the *DezignWorks* Test Drive.

Creative Dezign Concepts Inc. was accepted into the PTC Partner Advantage Program as a Silver Tier. *DezignWorks* allows users to utilize digitizer devices such as *Faro*, *Romer* and *MicroScribe*. *DezignWorks* in conjunction with Pro E Wildfire expands on the software's legacy of simplicity, design power, and affordability by providing users with comprehensive drawing tools and new features that will speed the implementation of 3D design.

A recent study estimated that 80% of new designs came from existing designs, generally an existing part. DezignWorks easily modifies parts to meet the needs of the consumer and improves the design for new products. DezignWorks offers best fit capabilities for lines, arcs, circles and splines in 2D and 3D sketches and also includes several utilities for capturing complex curves as well as spline uniformity tools.

About Creative Dezign Concepts Inc

Creative Dezign Concepts Inc develops and markets software for reverse engineering. It is the leading supplier of 3D CAD / CAM Products for the NASCAR Race Teams. *Creative Dezign Concepts Inc* is also a certified VAR (value added reseller) for *Cad/Cam* software such as *SolidWorks*, *Cosmos*, *Edgecam* and *DezignWorks*. *Creative Dezign Concepts Inc.* utilizes *DezignWorks* on a daily basis, as a service bureau offering reverse engineering services, constantly testing and implementing industry first technology. Located in *Mooresville, NC (Race City USA)* home of over 95% of the *NASCAR Race Teams*. *Creative Dezign Concepts* works with the *NASCAR* race teams on a daily basis to improve their performance. For the latest news, information, or a Webex demonstration, visit the company's web site (www.dezignworks.net) or for other 3D CAD / CAM products visit (www.gocreative.net) or call 1-704-660-5100
